"Let our family help yours be part of a green tomorrow"

TELAMODE produces and distributes biodegradable waste management products for septic systems, grey/black water holding tanks, and grease traps. These natural digesters (anaerobic and aerobic bacteria and enzymes) can be applied directly to your toilet. Each product is designed to keep the biological balance with nutrient rich by-products. They enhance and maintain a suitable environment for life and growth.

TELAMODE carries environmentally friendly multi purpose cleaners and odor eliminators for cleaning and maintenance of bathrooms and kitchens. These products degrade soap scum, grime, organic build-up, lime and mildew, light rust and hard water deposits from all bathroom and kitchen surfaces. Our bathroom products clean and freshen the toilet bowl while preventing pipe blockage.

TELAMODE products "were" certified with the Eco-Logo in 2002. You are getting a product that meets or exceeds the standards of an Organic Earth Friendly Product. This is verified on a yearly basis. Feel free to browse our products and contact us if you have any further questions.

RC-4 Septic Tank & Drainfield Cleaner

- ✓ Liquefies and digests organic matter in the tank and drainfield
- ✓ Eliminates odours & removes clogs
- ✓ Reduces need for frequent pumping.
- Opens earth for maximum absorption
- ✓ Keeps pipes from corroding
- ✓ Harmless to humans and animals
- ✓ Low cost & easy to use

Tela-Chem Drainline Cleaner

Tela-CHEM is formulated for the degradation of organic waste matter that exists in drain lines, septic systems and grease traps

- ✓ Increased Grease Digestion
- ✓ Significant Odour Reduction
- ✓ Rapid Digestion of a Wide Range of Organic Compounds
- ✓ Reduced Corrosion, Sulphate reduction occurs
- ✓ Stabilizes PH and gives Long Term Stability (2 to 4 years)
- Line snaking is no longer necessary

Tela-MS7 Degrader

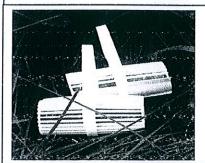

Tela-MS7 is formulated for the septic system that is clogged, or neglected. Please contact us for information about application.

- ✓ Digests difficult compounds, which cause blockages and kill naturally occurring bacteria
- ✓ Provides rapid breakdown of difficult detergents, fats, oils, tissue, paper, grease
- ✓ Works in either the presence or absence of oxygen
- ✓ Non- corrosive, non-pathogenic; safe to handle and store
- Tested and standardized for a high level of quality, Bacterial count of 4 billion/gram

Tela-BLAST Liquid & SEPTA-FLUSH Dry Holding Tank Cleaner

- ✓ Cleans holding tanks, lines and equipment
- ✓ Safe, non-toxic liquid formulation
- ✓ Easy to pour one liter bottle
- ✓ Acceptable at all dump stations
- ✓ Long lasting odour control
- ✓ No formaldehyde or other poisons
- ✓ Dry formula for RV's on the go
- ✓ Liquid formula for stationary RV and for cleaning toilets, showers, sinks and garbage bins

Biological Toilet Bowl Hangers

Simply hang over the rim of the toilet so that it is in the flow of the water when the toilet is flushed.

- ✓ Saves water which saves money
- ✓ Works in all types of urinals or troughs
- ✓ Cleans and Freshens
- ✓ DSL approved Bacterial Cultures
- ✓ Environmentally Safe
- ✓ Prevents blockages in Traps and Pipes
- ✓ Reduces odours

TELA-CLEAN Multipurpose Cleaner and Odour Eliminator

This all natural formula degrades soap scum, grime, organic build-up, lime, mildew, light rust, and hard water deposits from all bathroom and kitchen surfaces.

- ✓ Digests Wastes
- ✓ Controls Odours
- ✓ Easy to Use
- ✓ Safer than Chemicals
- ✓ Biodegradable Formula
- ✓ Can be used almost anywhere

TELA - CLEAN

MULTI PURPOSE CLEANER and Odor Eliminator

Our tela-CLEAN multi purpose cleaner is effective for commercial and residential use. It is an all natural formula that degrades soap scum, grime, organic build-up, lime, mildew, light rust and hard water deposits from all bathroom and kitchen surfaces. Tela-CLEAN is also capable of degrading uric acid which is the leading cause of urinal odor. Tela-CLEAN is made producing non-pathogenic enzyme from a bacteria unlike other chemical based cleaners. This bacterium is safe for humans, animals and the environment when properly used. Tela-CLEAN cleans and deodorizes without leaving any harmful residues which makes it especially desirable for families with pets, small children and people with sensitivies.

Benefits of TELA-CLEAN:

- ✓ Digests Wastes
- ✓ Controls Odours
- ✓ Easy to Use
- ✓ Safer than Chemicals
- ✓ Biodegradable Formula
- ✓ Can be used almost anywhere
- ✓ Packaged to suit your needs

WORKS GREAT FOR COMMERICIAL ...

...AND RESIDENTIAL BATHROOMS!!

PERFECT FOR KITCHENS!!

The Tela-Clean Multi Purpose Cleaner is a bit different than conventional cleaners...you spray and walk away then come back and mop the surface you are cleaning. Tela-Clean builds a wall if you will so that the more you use it the more the grime, dirt, soap will mop off the surface when cleaned and rinsed.

Tela-Clean digests mold etc. organic only on the surface and inhibits, digests cell grow or spread of germs. You do not need any special gear to use it, gloves etc..Tela-Clean is biological, certified Organic Earth Friendly and will not cause any breathing problems etc.. In other words you can sleep with it as Tela-Clean is not a harmful chemical that lingers when used. Tela-Clean can also be used to clean the hose and pipe in the wall behind the washing machine. Just mix 1/4 cup with water to a 1/4 cup of Tela-Clean and poured down the black hose in the wall. This will digest all the lint and soap build up that can close off the main drain pipe into the septic tank.

The parks down south love the **Tela-Clean** for black streaks and build-up on their vinyl fencing etc.. If **Tela-Clean Multi-Purpose Cleaner** drips onto the ground it will not kill grass flowers or harm animals that are in contact with the cleaner.

To save money, just keep your 1 quart/litre bottle along with the spray nozzle and reorder a refillable 1 gallon jug.

ORGANIC EARTH FRIENDLY

Solutions for Natural Waste Management

SEPTA-FLUSH

SEPTA-FLUSH

"Let our family help yours be part of a green tomorrow"

SEPTA-FLUSH

DRY

CERTIFIED RV & MARINE HOLDING TANK ADDITIVE

- Eliminates odours
- · Cleans level sensors
- · For black and grey water tanks
- · Acceptable at all dump stations
- No formaldehyde or other poisons
- Available in a one pound jar and convenient pre-packaged, pre-measured water soluable one ounce pouches

SEPTA-FLUSH

One pound (450 g) jar with a minimum 32 treatments per jar.

This is a 100% active product giving you the most effective and economical certified product available.

tela-BLAST

LIQUID

CERTIFIED RV & MARINE HOLDING TANK ADDITIVE

- · Cleans holding tanks, lines and equipment
- Safe, non-toxic liquid formulation
- Easy to pour one litre bottle
- Long lasting odour control
- No formaldehyde or other poisons

tela-BLAST

One litre bottle with a minimum 10 treatments per bottle.

Available at environmentally friendly RV dealers, campgrounds and marinas.

www.telamode.com

SEPTA-FLUSH & tela-BLAST RV HOLDING TANK ADDITIVES ORGANIC EARTH FRIENDLY CANADIAN * LOOK FOR THE LOGO ON THE LABEL *

DIRECTIONS FOR USE

SEPTA-FLUSH & tela-BLAST are organic products that contain friendly bacteria. Instead of "pickling" the wastes in holding tanks as the *chemical* holding tank products do, SEPTA-FLUSH & tela-BLAST breaks up and starts digesting solid wastes and paper. When a tank is dumped wastes have started breaking down and will finish breaking down naturally in any sewer system. Chemical holding tank products are designed to KILL all bacterial activity in holding tanks. When chemically treated wastes are dumped they inhibit or kill all action in the campground/park sewer system.

Because SEPTA-FLUSH is a bacterial product it is used a bit differently than <u>chemical</u> holding tank products. Tanks should be completely dumped and thoroughly rinsed with water before adding SEPTA-FLUSH for the first time. SEPTA-FLUSH will be more effective after the third tank full has been dumped because of the residual <u>chemical</u> that is still there. SEPTA-FLUSH can be used in both <u>gray</u> and <u>black</u> water tanks.

When treating holding tanks with SEPTA-FLUSH the correct dosages are one tablespoon (half fill scoop provided in each jar) for *black water* tanks and ½ a tablespoon in the *gray water* tank. It is also important to add 2 to 3 gallons (8 to 12 ltrs) of water to the black water tank for SEPTA-FLUSH to work correctly. If the tanks will not be used for a while after dumping, SEPTA-FLUSH should not be added until the tanks are in use. Also if the unit is stationary this becomes even more important because the liquid is not being sloshed about the tank, as it would be if the unit was traveling down the road. If odours persist or return simply add more water. SEPTA-FLUSH should not be used in conjunction with *chemical holding tank products*. Cleaning products flushed into the holding tank can also affect the performance of SEPTA-FLUSH.

Tela-Blast, our liquid holding tank additive gives you instant <u>odour control</u>. When treating holding tanks with **Tela-Blast** the correct dosages are 150ml/4oz for *black water* tanks and *gray water* tanks. Add approximately 4ltr/4qt of water.

Tela-Blast can also be used for deodorizing and cleaning toilet bowls and bathrooms (instead of chemical cleaners) to help maintain and not kill bacterial action. Just dilute 4:1 for cleaning toilets. Use either a bottle fitted with a spray head Spray urinals and toilet bowls and the area around them and let sit. The longer our products work the better the results. Spray shower stalls, sink and any surface you wish to clean, except mirrors, with the same solution. Wipe everything down except toilets and urinals, those you want to save till last. If the sink now needs additional cleaning, use a mild abrasive such as baking soda. Harsher cleaning products should only be used if absolutely necessary. Lemon juice and vinegar will also remove some stains. After cleaning all but the toilets and urinals, mop the floors. Don't forget to clean those garbage cans that come in and out of the RV as they are germ carriers.

Tela-CHEM DRAIN LINE CLEANER

WHERE TO USE:

Use wherever you find clogged drain lines/tiles, grease, fat and oil. **Tela-CHEM** is formulated for the degradation of organic waste matter that exists in drain lines, septic systems, grease traps, wet wells and lift stations.

RECOMMENDED FOR:

HOME, RESTAURANT, CAMPGROUND, RESORT, INDUSTRIAL AND MUNICIPAL USE.

PRODUCT BENEFITS AND FEATURES:

- Increased Grease Digestion
- Significant Odour Reduction
- Rapid Digestion of a Wide Range of Organic Compounds
- Reduced Corrosion, Sulphate reduction occurs
- Stabilizes PH & Adds Heat in winter cold
- Long Term Stability (2 to 4 years)
- Line snaking is no longer necessary

HOW TO USE:

HOME, CAMPGROUND, RESORT

PER PERSON USAGE SCHEDULE APPLIES

For drain lines apply 25 to 30 ounces (1 bottle) per application or as required per person usage. For home use for drain tiles, use 1/4 bottle every 3 months for yearly maintenance.

Simply pour TELA-CHEM into your various bathroom toilets and drains last thing at night. Allow TELA-CHEM to sit in the pipes overnight with little usage, water flow, on the system. This will help digest whatever organic materials, or sludge, that may be clogging or slowing down your pipes (i.e. hair, food, lint, etc). Clogged drains discharge unhealthy gases that can cause health problems.

Simply rotate the drains every 3 months: kitchen, bathroom, laundry room.

Use down the back of the laundry tub to digest laundry soap and clothes fibre build-up.

Simply pour (with a small funnel) down the black hose in the wall.

MUNICIPAL, INDUSTRIAL, RESTAURANT

For drain lines and grease traps apply directly to the head of the drain line system prior to the grease trap. This is a ready to use concentrate, which may be applied continuously by a chemical feed pump, (at a rate of 25 to 30 ounces per day minimum) for large systems.

TELA-CHEM DRAINELINE CLEANER is available in: 1 Litre/Quart & 1 Gallon Bottles, 2 ½ Gallon Pails, and 5 Gallon Pails

For optimum results to enhance percolation action follow-up with RC-4 Drainfield Digester and Septic Tank Cleaner.

Tela-CHEM DRAIN LINE CLEANER adds essential nutrients to the drainfield.

FOR MORE INFORMATION TO PLACE YOUR ORDER CALL 1-800-263-2951

Visit us on the web: www.telamode.com
CERTIFIED ORGANIC EARTH FRIENDLY

RC-4

Septic Tank & Drainfield Cleaner

Certified ORGANIC EARTH FRIENDLY

Household cleaners and detergents kill off bacteria in septic systems. RC-4 - Septic Tank and Drain field Digester replaces the bacteria that is needed in your tank to digest and liquefy organic waste.

RC-4 contains many enzymes and specialized bacteria resulting in a faster digestion of sludge and organic wastes. RC-4's cleaning strength is recommended for PROBLEM or CLOGGED DRAINFIELDS, WATER CONDITIONERS (softeners & treatments), AND HIGH TRAFFIC USAGE as well as normal tank situations. RC-4 is completely safe and easy to use - just flush down the commode last thing at night once a month. RC-4 is harmless to humans, animals and the environment.

RECOMMENDED USE - MONTHLY MAINTENANCE

1/3 bag per month – family of 2

(1 bag will last 3 months)

1/2 bag per month - family of 4

(1 bag will last 2 months)

1 bag per month - family of 5 or more (1 bag will last 1 month)

*MAINTAIN YOUR SEPTIC SYSTEM AND DRAINFIELD WITHOUT WORRY TO AVOID "COSTLY PUMPING". IT IS RECOMMENDED THAT YOU HAVE YOUR TANK PUMPED AT LEAST EVERY FIVE YEARS.

RC-4 has agents that will keep your drain field open and your system free flowing. RC-4 will digest and liquefy any ROTTING or GROUND WASTES such as grass or leaves to help create the proper PH level in "YOUR DRAINFIELD" keeping it healthy, clean and odour free.

Costly Pumping removes the friendly bacteria from your septic tank and DOES NOT CLEAN YOUR DRAINFIELD. It takes 3 to 4 months for friendly bacteria to build back up, leaving the day-to-day wastes undigested. TELAMODE recommends additional RC-4 be used after the SPRING THAW and again just before WINTER to keep wastes from backing-up. TELAMODE bacterial products add Heat in WINTER. Use as follows:

RC-4: Twice a year just use one bag - 1/2 cup once a week for 4 weeks. Wait 4 weeks and start your regular monthly maintenance. TELA-MS7

> Dry Concentrate Bioactive Formulation WASTE DEGRADER

TELA-MS7 DEGRADER is a dry concentrate bacterial formulation specifically designed to provide improved waste degradation for houses, campgrounds and resorts. TELA-MS7 contains a synergistic blend of new bacterial strains, which have been scientifically developed (selectively adapted) to cope with difficult compounds and chemicals present in wastewater effluent. Unlike any other bioformulation, TELA-MS7 contains bacterial strains, difficult and nonactually digest which biodegradable, compounds such as detergents, paper, oil, grease, hydrocarbons, phenols, etc.

TELA-MS7 bio-formulation provides exceptional results when utilized to accomplish reseeding of wastewater and septic systems where chemical kills have occurred and for the continued maintenance of bio-systems to insure optimum performance.

TELA-MS7 formulation significantly improves the performance of septic tanks, lagoons, activated sludge, trickling filter and waste holding basins. These cultures provide the best protection your customers can buy for wastewater applications.

BENEFITS:

- Digests difficult compounds, which are toxic to naturally occurring bacteria or existing sewage bacteria
- Provides rapid breakdown of difficult detergents, fats, oils, tissue, hydrocarbons, etc.
- Cultures grow in either the presence or absence of oxygen
- Long-term stability (2 years) and proper PH levels
- Non- corrosive, non-pathogenic; safe to handle and store
- · Each batch is tested and standardized for a high level of quality, Bacterial count of 4 billion/gram

Good morning Allan,

We are setting up an online catalogue for your product offerings. Do we send the PO's to telamode@telamode.com?

After November 3rd, is there new pricing that we would need to update in the catalogue? I wouldn't imagine that any resorts would be ordering after November 3rd, but I am being asked the question as we want to keep this catalogue up to date.

Thank you in advance for your response.

Ernie Ethier, CIAPP

To: Ernie Ethier <eethier@parkbridge.com> Subject: RE: PARKBRIDGE PRICING -ADDITION

Hi Ernie,

The Tela-Blast 1 liter Suggested Retail Price is \$10.25 and the Tela-Blast 4oz Suggested Retail Price is \$4.95. Most campgrounds are selling the 4oz at \$5.00 and also giving the free sample of 4oz with the seasonal rate. The Campgrounds let the RV'ers know they sell the 1 liter and their choice of product for the park.

Our Distributors are Independent. Telamode cannot force a sale price on our Distributors or freight charges. Telamode Distributors are not Franchised, they set their own pricing after "their" cost of product and freight. The best we can do is send product (skids) to a Parkbridge location and have Parkbridge distribute from there.

Allan Millward

Won't you join us for the 2021 Pennsylvania Campground Owners Association

Trade Show?

Your products & services are what our campgrounds need!

Pennsylvania Campground Owners Association

Dear Exhibitor.

We want to see you at our Annual Convention at the Penn Stater Hotel and Conference Center in State College, PA, on December 6 & 7. Make plans now to attend. Each year campground owners from all over the state convene for their Convention and Trade Show. Not only is our membership notified of this Convention, but an invitation is sent to all 400 campgrounds located within the state.

The set-up time for you, the exhibitor, is scheduled for Monday, December 6 between 7:00 a.m. and 11:30 a.m. The exhibits will open at 12:00 noon. Exhibit hours on Monday will run until 6:00 p.m. On Tuesday, your area will open at 8:00 a.m. and will close at 1:00 p.m. No educational sessions have been scheduled for Tuesday to encourage the delegates to spend more time with you. A sincere effort has been made to keep the schedule light so that more time can be devoted to the Trade Show.

This show is a tabletop show (no pipe and drape). Your area is approximately an 8 foot by 8 foot, and includes one six foot table and two chairs. The space will cost \$360.00 for PCOA Associate Members and \$450.00 for non-members. A maximum of two spaces will be permitted per vendor. If you wish to have additional space, indicate on your contract and we will notify you if we do not fill. All booths are on a first-come basis, so send your contract in early.

If you need electricity, a \$40.00 fee will be charged. If you need a 220 hook-up or Internet, call Eric at 814-863-5043.

Your cost includes the Monday dinner and Tuesday breakfast. We welcome you to stay for the Tuesday lunch and banquet and the Wednesday events if you desire. An additional fee for these meal functions is listed on your show contract.

For those of you who cannot attend, but would like your literature to be distributed to the conference participants, brochures and booklets may be sent to me before November 10, 2021. The charge is \$50.00 for any amount up to 100 of any one piece.

Room reservations should be made directly with the Penn Stater Hotel and Conference Center. Their direct number is 814-863-5000. Central Reservations is 800-233-7505. Be sure to mention you are with the Pennsylvania Campground Owners Association, Code PACO21A. Room rate is \$120 single/double. The deadline for group rate is November 12, 2021.

It is with great satisfaction to support Telamode products. We have been using Tela-Blast, Biological Toilet Bowl Cleaner and Septa -Flush in our Trailer Park and in the Restaurant (for cleaning).

Following Allan's advise to introduce Tela-Blast (free) to our campers worked well. First of all our campers liked to receive a free bottle of Tela Blast, but they also understood that it is very important environmentally. Now, our campers purchase at least one to two bottles a season at our store. They love the fresh smell and that they can clean with it as well. We will continue using Telamode.

Sincerely,

Rainer and Betty Urbanski

Sept. 24/09.

Dear Alan,

Our Campground has 160 campsites and 9 Kamping Kabins. We have been using Telamode products for our washrooms for 4 years. We also use Telachem for our septic systems.

Over the last 4 years, we have stopped selling any products containing chemicals that are harmful to septic systems, we now sell only telablast.

Yours truly, Paul Cook, OWNER

RE: OPCA Feb. update

Allan

Telamode's service was great. Delivery was made right to our premises. The product works well, we've noticed a significant decrease in sewer back up within the Park since we started giving each customer a jar at the beginning of each season.

Hope that helps....

My Best Regards, Karen Challinor Red Eagle Trailer Park Inc. www.campredeagle.ca

Telamode

From: Wayne and Cecelia Schleder [meadowvale@oecblue.com]

Sent: Saturday, September 12, 2009 2:32 PM

To: telamode@telamode.com

Subject: Testimonial

Hello: We purchased 3 Telamode products in 2009 for our campground at the CONY Zone meeting. The individual packets of Tele Blast for RV toilets were well-received by our seasonal campers. The Tela Blast liquid product worked very well at the toilet house vaults to control odor. We also added Tela Chem to the 2 septic systems to revitalize the leech fields. We definitely will buy these products for the 2010 season.

Cordially,

Cecelia and Wayne Schleder, Hosts Meadow-Vale Campsites 1-800-701-8802 www.meadow-vale.com

Beaver Narrows Resort has been using TELAMODE Products for several years now and we are completely satisfied with the product.

Every season we use TELA-CHEM in our septic system and we sell TELABLAST in our store. We also give small samples of TELABLAST to every new resident of the resort in their welcome packages to encourage the use of this product.

We find that TELABLAST breaks down solids that may clog our lines and has a nice odor; and the residents of Beaver Narrows use it faithfully.

Sincerely,

Glenna Beattie Resort Manager – Beaver Narrows 705-799-6221 705-799-0033 – fax www.beavernarrows.ca info@beavernarrows.ca

We operate a seasonal campground with 275 sites in Ontario Canada. We have been selling Telamode products, Telabast and Speta-flush for close to 10 years in our campground. The campers like the product cause it works well in their holding tanks and it is environmental friendly. The costumer service has always been professional, with a phone call every year to see how things are going. We really appreciate the reminder call in the spring to order our product for easy pick up at our Annual Spring Camping in Ontario meeting. Another bonus is their price is just right! Thanks for the many years of great service.

BEING CONCERNED ABOUT ALL THE DIFFERENT HOLDING TANK PRODUCTS GOING INTO OUR SEPTIC SYSTEMS AND THE DAMAGE THEY MIGHT BE CAUSING WE DECIDED TO PUT ALL DUR SEASONAL CAMPERS ON ONE PRODUCT.

AFTER CAREFULLY CHECKING OUT MANY DIFFERENT ENVIRONMENTALLY FRIENDLY PRODUCTS WE CHOOSE TELAMODE

WE USE TELACHEM IN OUR SEPTIC SYSTEMS FIRST THING IN THE SPRING. WE GIVE ONE TELA-BLAST TO EACH SEASON, L EACH SPRING [WE INCREASED OUR SEASONAL RATE BY THE COST] AND THEN SELL IT IN OUR STORE

WE USE TEL-AX MSB FOR CLEANING ---- IT GREAT

WE HAVE HAD VERY GOOD RESULTS WITH THE PRODUCT AND OUR SEASONALS LOVE IT

WE ARE HAPPY TO RECOMMEND THIS PRODUCT
